How to Measure

**Series 4100 & 4500
Aluminum Casement Window Awnings**

Step 1: Using chart below, Choose the DROP that best suits your needs. This will determine how far down the window the awning will come. The DROP associated with the "Window Height" (A) is only a suggestion. You may choose any **of the drops within the table** you wish. Casement awnings require a minimum of 6" above the window for mounting. Windows opening more than 18" will require additional mounting space.

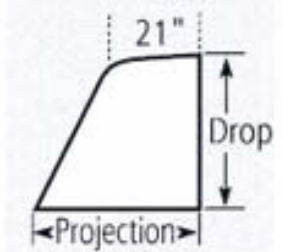

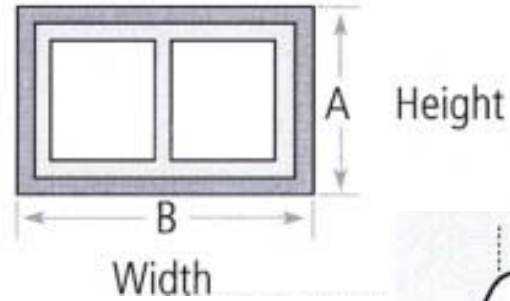

Step 2: Measure outside of window casing - edge to edge (B). If you mount the awning on the window casing (frame), this measurement is what you need. If you wish to mount the awning on the house wall then you need to add, at least, 1.5" on to each side to determine the final measurement. Awnings **cannot** be mounted on shutters.

Step 3: Color and Pattern Choices - Select color and pattern that best compliments your home, from our selection.

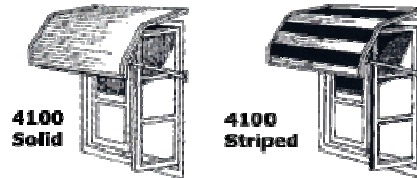

- a. Canopies are available in solid or stripped pattern (No additional cost).
- b. Series 4500 Sidewings are available in solid color only.
- c. Undersides of all aluminum canopies are white only.

Note: Special Orders in Custom widths up to 84", in one piece, in 1" increments are available. **Call 1-800-922-4760 for pricing on special sizes.**

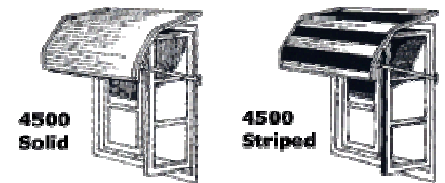

Obtaining necessary permits is the sole responsibility of purchaser. Customers agree to hold ScreenHouses Unlimited and manufacturer free of any liability for improper installation, maintenance and repair.
