All Prices in Canadian Dollars. Delivery to major centres in Canada is included! No Extra Charges! No Silly Fees! Only applicable taxes are extra.

How to Measure... for the Series 4300 fabric casement window awning

Awnings make a better home. Add window awning kits for shade, or door canopy kits for all weather protection. Retractable patio awnings for sun protection on your backyard deck. Trust us for quality products at discounted prices.

Step-1: Using the chart below choose DROP & PROJECTION that

best suits your needs. This will determine how far down the window the awning will come. The DROP associated with the "Window Height" (A) is only a suggestion. You may choose any of the drops within the table you wish. Casement awnings require a minimum of 6" above the window for mounting. Windows opening more than 18" will require additional mounting space.

Step-2: Measure outside of window casing - edge to edge (B). If you mount the awning on the window casing (frame), this measurement is what you need. If you wish to mount the awning on the house wall then you need to add, at least, 1-1/2" on to each side to determine the final measurement. Awnings **cannot** be mounted on shutters.

Step-3: Select a fabric that best compliments your home, from our selection of over 50 fabric choices - The complete line of Sunbrella fabrics is open to you. All we need is a name and number of the fabric you would like. All fabric awning framework is in Bronze finish.

Note: Get the width you need going up in 1" increments.

Awning Model #	6	7	8	9
For Window Heights of:	46"	56"	66"	76"
Projection	30"	32"	35"	38"
Drop Approx.	25"	31"	37"	40"
