

## Getting a Quotation... What we need from you...

We will gladly supply a quotation under the following guidelines... We will not help our customers take short cuts. For your safety and insurance purposes we will need the following information before considering your request for a "no obligation" quotation...

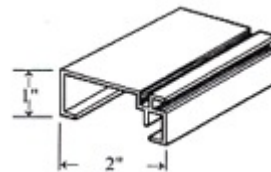

- Ideally we will require a drawing of your application, indicating all existing posts, distances between them and exactly where you would like to have your door placement relative to the house wall or to a front corner. You get a sample of one of our customer submissions below. Nothing fancy... you can either fax it to **705.735.0360** or scan / email your drawing to [info@patioconcepts.ca](mailto:info@patioconcepts.ca)
- If you have no existing posts, give projection (away from wall) and width dimensions and again your door placement relative to the house wall or to a front corner.
- Lastly we will need to know the highest dimension from floor (deck or patio) to existing roof line AND... whether you require a bottom kick-plate (which can be none, 18" or 24").

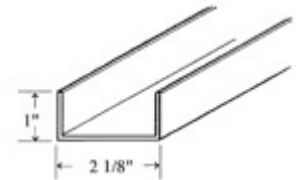

H122 - Vertical supports

H120 - Used in place of the H122 on a corner

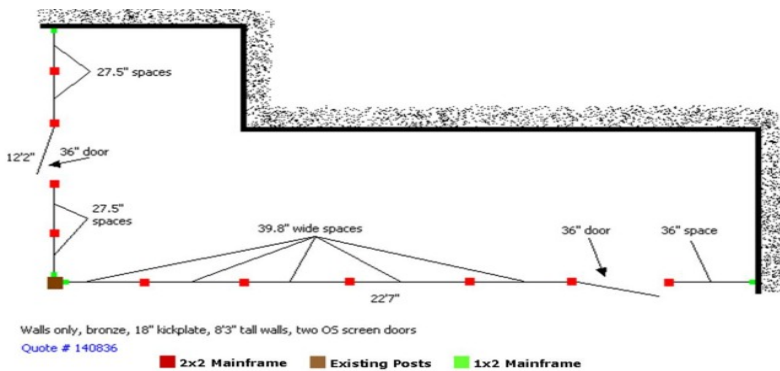

H121 - Horizontal supports.. top, bottom and mullion

H123 - top and bottom U channels

Once we have reviewed your drawing and asked any remaining questions (be sure to include your name, phone number and email address), we will send you your quotation which will include cost, details and a drawing that indicates how to use the material. The drawing below is a sample of what you will get with your "no obligation" quotation...

We accept VISA, MasterCard and PayPal payments OR get a 5% discount by sending a Certified Cheque. Please note special or custom orders not returnable.
