

12' Round Dark Blue Top

The Jardin

Round Style Screen Enclosures

Starting at:

\$1980.00 **\$1881.00**

Credit Card 11' Round Certified Cheque
Up to 14' round available

General Information

- Our 14 ounce vinyl tops are made in our own factory. We use a heavier, stronger vinyl with a smoother surface than our leading competitors and the vinyl panels are heat sealed together in both the free standing and wall attached units, not sewn.
- We have a roof tightening system built into the end of the roof rafters which extends 5" beyond the screen walls providing a roof overhang.
- Screen Panels are a 1/8" thick extruded aluminum - light weight, but very strong. Panels are 44" in width and 74" high with pre-installed fiberglass screening, top to bottom. The supporting bar is positioned at bottom third of panel for maximum viewing pleasure. The height of the screen panels gives easy walk through and allows for a cooler room on the hot sunny days.
- Roof tensioning system is built into the end of the roof rafters and is accessed from within the overhang using a large thumb nut
- All stainless steel hardware for superior strength & long life.
- The combination of roof overhang, roof tensioning system and roof pitch means that water accumulation on the roof is virtually eliminated.
- All panels are bolted together. No silly cables or plastic pieces. The supplied hardware is stainless steel for maximum strength and weather-ability.
- This is a very high quality, long lasting gazebo style room that is easily assembled within a few hours.
- Clear or vinyl windbreaker and privacy panels available to enclose your unit from the weather. Check out our [Options Page](#) for details and pricing.

Warranty

Jardin Gazebo's and Screen Rooms are guaranteed free from all defects in workmanship and materials for a period of 1 (one) year following shipment of the unit from the factory. Due to the nature of the fiberglass screening used in these items, Veranda Jardin cannot guarantee the screen itself after the box has been opened. This warranty is void in the event the unit has been subject to abuse or incorrect assembly. Veranda Jardin is not responsible for damage caused by weather.

Veranda Jardin	Benefit...
The Roof	
Our vinyl tops are made in our own factory.	Other manufacturers use outside sources. Each top has to pass our internal quality control.
We use a heavier, stronger vinyl with a smoother surface	Stronger vinyl lasts longer Smoother surface cleans easier.
The vinyl panels are heat sealed together in both the free standing and wall attached units, not sewn.	Threads at the seams will dry out and leaks may appear over time. Heat sealing prevents seam leakage.
The top slips into place behind each roof rafter and is held there by tightening each roof rafter, at the back wall into the mounting bracket with a thumb screw. To remove the top, simply loosen the thumb screws and slide the top out - all achieved inside the room.	Other manufacturers use a "c" channel system. The top is slid, from the side into the channel. This system leaves the top susceptible to rips, tears and stretching each time you put the roof on.
Roof rafters are 1" galvanized steel tubing	Lots of built-in strength & weatherability.
The top extends beyond the screen walls providing a roof overhang of about 5"	Rain water will not run down the screens. Provides better protection from the sun and rain.
Roof Tensioning System, built into the roof rafters within the 5" overhang.	Allows you to manually (using a large thumb nut) adjust the tension of the roof, virtually eliminating any water accumulation on the roof.
Rain Gutter system built into the wall attached systems. This is not available on free standing units.	Water runs to either side of the room, not off the front. Allows you to walk in and out of the front door with out getting wet from the runoff from the roof.
Choice of 6 colors: Green, Blue, Grey, White Burgundy or Taupe	Other manufacturers typically offer a beige top only. We have a color to suit your surroundings.
Colors can be mixed within the top	Custom made with your choice such as Green & White
Veranda Jardin	Benefit...
The Screened Wall Panels	
Extruded Aluminum - Light in weight, but very strong	We do not use rolled formed steel, no rusting, ever.
Panels are never more than 44" in width	Other manufacturers typically have 50" panels. Panels over 48" wide do not have sufficient rigidity and are easily bent by children or the wind.
Fiberglass Screening, top to bottom	Nylon mesh (typically found in tents) will not allow sufficient air circulation. Our screening can be easily replaced yourself if needed with readily available screen kits at your local hardware store.
Horizontal support bar positioned at bottom third of screen panels	Unobstructed view. ALL other manufacturers set bar at centre of panel
Connected by heavy duty flexible PVC vinyl hinges and then bolted together with stainless steel brackets for superior rigidity	Other manufacturers depend on cables, plastic roof tip parts and Velcro to hold their rooms together.
Mounted to your deck or patio with heavy gauge PVC channels in the wall mounted kits or PVC foot brackets in the free standing units	Assures a solid and a secure attachment. One the factor that enables our screen enclosure to stand up to heavy weather.
Sliding Doors are a standard accessory in the wall attached 3 sided rooms and single sliding doors are standard in the free standing square, rectangular, and spa enclosures. *Note that a swing out door is standard on all round models.	2 - 33" or 44" doors allow easy entry and movement of larger items. Available on Patio Plus models only
Optional Single sliding doors, can be placed where needed on free standing square, rectangular and spa units as well as on the wall attached 3 sided rooms.	The option of more than one entry and exit is great for decks that lead to another deck or come in from one side and then out to the yard on the other.
Optional Vinyl Windbreaker panels (can be same color as the top) can be used on the top 2/3 or bottom 1/3 of screen	Supported by an aluminum frame with spring loaded locks that hold it securely on the inside of the screen. Easy to use.
Optional Mylar windows (As above but clear Mylar)	Designed for top 2/3 of screen panel, hinged in the middle for opening to allow air circulation. Easily put on or removed.
