1. Post Caps (4)
2. Posts (4)
3. Side Panels (8)
4. 3.5" Stainless Steel Screws (16)

4

Not to Scale

General Information

- **Read Instructions through carefully before beginning assembly.**
- When assembling components, place on a non-abrasive surface (i.e. shipping box) to avoid scratching.
- We recommend an area approx 4'x 8' for unobstructed assembling.
- You should not need to use excessive force when assembling components.

STEP ONE

Raised Bed Installation

1

Excavate four, 8-inch holes in a square pattern (49½" x 49½") as shown aside. Holes are to be 10 inches deep.

2

Place a post into each of the four holes. The posts will be buried 10 inches into the ground.

3

Stack the side panels two high between the posts. While ensuring the posts and side panels are level, replace the excavated dirt back and around the holes.

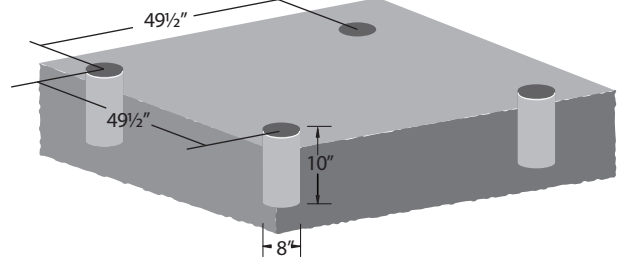

4

Using the screws provided, fasten the side panels to the posts. (One screw for each intersection of side panel and post).

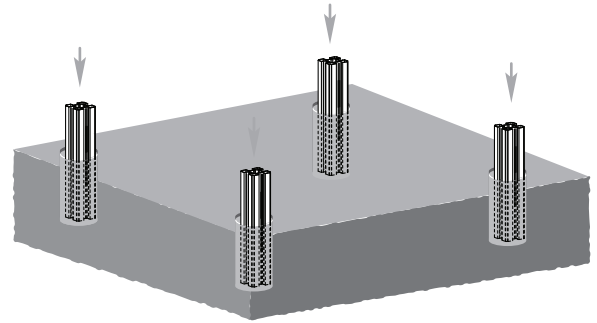

5

Pressure fit a post cap onto each of the posts.
