

PORCH SCREENING SYSTEMS (WALLS ONLY)

Quality DIY kits shipped accross Canada. Your online source of screen enclosures, porch kits, patio covers, carports & more since 1997.

-  "Materials supplied" screen room system
-  Add beauty and functional 3 season living space to your home
-  Strong, professional and more affordable than house extensions
-  Add vinyl lip frame windows or 4 track sliders to enclose the room.

Add a beautiful and functional 3 season living space to your home.

The porch screening system creates a new outdoor living space using extruded aluminum frames complete with screening and hardware that, when put together, create a permanent installation. They are custom designed to fit your needs. High quality, durable and maintenance free, the aluminum frames come in a variety of colors.

High quality, permanent installation.

This is a very high quality, long lasting screen room that is easily assembled within one to three days depending on the size of your application. All parts are screwed together. There are no plastic pieces. The framing is all extruded aluminum with baked on enamel finish. The supplied hardware is extruded aluminum for maximum strength and weather-ability.

FRAMES

2x2 or 2x3 frames that can support over 80psf loads.

OPTIONS

Kickplates, fan beam panels & choice of colors to suit.

SCREENING

Fifteen different screening options available.

VINYL WINDOWS

Vinyl windows are available to fully enclose the room.

Custom Sizes & Quotes

FRAME OPTIONS

We provide you with extruded aluminum frames complete with screening and hardware that, when put together, create a permanent installation. The H122 mainframe has a .048" wall thickness and the H120 mainframe (for corners) has a .062" wall thickness.

The 2" x 2" frame system is by far the most commonly used screen enclosure kit due to its quality and value mix.

The stronger 2" x 3" posts allows you to increase the size of the openings.

SCREEN OPTIONS

We have **fifteen different screen options** ranging from standard fiberglass woven from permanent glass yarn, to a range of glass shield fiberglass meshes.

Vinyl-laminated, tightly-woven aluminum mesh, pet-resistant insect screening is tear and puncture-resistant to prevent damage by dogs and cats. Solar Insect Screening offers the ultimate in insect protection while at the same time stopping up to 65% of the sun's heat and glare, and more!

DOORS

From one-lite tempered glass and insulated storm doors to Classic screen doors with brass or platinum hardware, we have ten different styles of doors - including a full-lite 2 inch aluminum insulated door that has a Residential Performance Grade (PG) of R-PG50.

KICKPLATES

You will need to make a choice of no kick-plates or 18" or 24" kick-plates. With 'no' kick-plate, the horizontal 2x2 that is installed between verticals can be placed at any height you wish.

CHAIR RAILS

Horizontal chair rails are recommended if you don't have a kick plate and your openings are larger than 54". They can be placed at any height. We recommend somewhere below the midpoint to create a clear line of sight for when you are seated in the room.

COLOR CHOICES

Aluminum extrusions and panels come in several colors that can be selected individually to create your own unique space. Choose between white, clay, wheat or dark bronze for any or all of the components. Your room can be one single color or accent with a combination of light and dark colors. The choice is yours!

OPTIONAL VINYL WINDOWS

If accidentally pushed or distorted vinyl will return to its original shape within minutes.

The tough 10-mil vinyl glazing gives the benefit of glass without the cost or the weight. It's as transparent as glass, but not nearly as heavy. Or expensive.

Standard Lip Frame

Lightweight for light-duty projects. Designed to fill openings too small for Vertical 4-Track products.

Heavy-Duty Lip Frame Lite

Pairs seamlessly with the Horizontal Side Slider. Designed to fill openings too small for Horizontal Side Slider products.

Horizontal Side Slider

Panels that slide from side to side.

Vertical 4-Track

Panels that raise and lower.
