Round Patio Rooms

Free-Standing Screened Spa Gazebo Kits

- These specialty spa enclosures have a **Roof Structure** that is made of 1.5" square extruded aluminum with a baked on enamel finish. **Once up, there is no need to take it down!**
- This garden gazebo kit has a **Super Vent** system built into the roof, allowing for the escape of wind and humidity.
- The Carrousel garden gazebo kit has a cover that will last up to 15 years in normal conditions. This **22 Ounce Vinyl** is made to last. Need more? Okay, finally there is a special cold crack resistant additive to the vinyl so that the top can withstand temperatures as low as -50°F. Of course it is guaranteed for 5 years against discoloration.
- **Designed to stay up all year round** the Carrousel is built on an extruded aluminum frame. The aluminum is coated with baked-on enamel paint (white or beige) that will neither rust nor peel. The 22-ounce vinyl canvas has a lifespan of 15 to 18 years and remains installed year round.
- It is also flame retardant (NFPA 701), UV resistant to prevent yellowing, tear and abrasive resistant and we have incorporated an "anti-wicking" agent to prevent mold and mildew. Its vinyl panels are heat-sealed together to make the canvas that much more efficient.
- The Flash System, our patented non-lacing fastening system, allows you to apply the optimal canvas tension to the frame.
- The polymer windows can be easily removed to facilitate maintenance. We recommend cleaning them with a mild, non-abrasive soap diluted in a large quantity of water.
- These sunroom kits also have a **6" Overhang** built into every unit, preventing the rain from washing down the screen face.
- Also as part of the overhang is our aesthetically pleasing **Double Valance**, where the second valance is white and is part of our special roof attach system. Our valences can be the wave format or straight - your choice.

| Size | # of Panels (56.5" x 78") | In-Swinging Door (35" wide) | Roof Color | Price (\$) CAN Credit Card | Price (\$) CAN Certified Cheque |
|--|------------------------------|--------------------------------|------------|-------------------------------|------------------------------------|
| 11'9" Round (CARRW-1111) White frame clear polymer windows | 8 | Std. | Choice | \$15,590.40 | \$15,590.40 |
| 11'9" Round (CARRB-1111) Beige Frame smoked polymer windows | 8 | Std. | Choice | \$15,590.40 | \$15,590.40 |

All pricing in Canadian Dollars. Delivery to major centres in Canada is included. No Extra Charges! Only applicable taxes are extra.

Highest Quality

- The support bar? What support bar!?! This screen room kit gives you a clear line of sight because our panels are made with the highest quality extruded aluminum and engineered for maximum strength.
- The extruded aluminum frames (extrusion dies are exclusive to these screen room kits) are wide enough to incorporate fully framed sliding polymer windows.
- Left side hinged heavy duty in-swinging door is standard. The door has a lockable easy entry handle.
- The heart of the quality of this screened patio enclosure is its roof tightening system which allows you to maintain a tight roof all the way around the unit. It is ingeniously easy and stretches the roof over its supports without exposing the roof to rough edges or corners. A patented "over and under" roof tightening system allows you to keep your cover looking good year after year. We call it our FLASH system because it is quick and easy!
- Of course our Flash system is part of a 6" overhang built in all the way around the screen enclosure preventing water runoff from flowing down the screen face.
- All panels are snap fit construction finished off with finishing hex screws to add support, rigidity and strength. No cables - no plastic pieces.
- Roof support assembly is made of 1 1/2" square extruded aluminum poles all coming together in the peak in a specially designed extruded aluminum hub.

Obtaining necessary permits is the sole responsibility of purchaser. Customers agree to hold ScreenHouses Unlimited and manufacturer free of any liability for improper installation, maintenance and repair.

5 Year Limited Warranty

(light not included).

- The combination of roof overhang, roof tensioning system and roof pitch means that water accumulation on the roof is virtually eliminated.
- This is a very high quality, long lasting gazebo style room that is easily assembled within a day.
- Vinyl top color choices: green, blue, eggshell, burgundy & beige
- Five year warranty on all major materials.

Note: 143" includes an extra 1" all around to account for installation flexibility

Panel width = 56.5"
Door width = 35"
Door Swings in...
Wall Height = 78"
Interior Height = 119"

- the exact footprint of the panels are 141" x 141"
- angle of octagonal is 22.5 degrees
- a standard 56.5 inch panel with door is composed of 2 small side panels and 1 door - 35 inches wide
- there is a 6 inch overhang all around the structure making the overall roof dimensions 148" x 148"
- overall height of structure is 119"
